Note: 1. Specifications are for device without connectors; Specifications may change without notice.
2. To add connectors, $I L$ is 0.5 dB higher, RL is 5 dB lower, ER is 2 dB Lower, Connector key is aligned to slow axis.
3. The devices can only work in slow axis and fast axis is blocked.
4. Devices for higher optical power or with other type fiber or consigned fiber are also available; Devices can only work in the core of Double Cladding (DC) Fiber, Cladding Power must be stripped before connecting the device.
